## STANDARD SPECIFICATION

### HULLFORM AND CONSTRUCTION

All gel coat and glass fibre hand laid with unidirectional, biaxial and woven rovings Antifouling protection to hull  
Deep 'V' forward; 20° deadrise aft  
Designed by Bernard Olesinski and the Fairline design team  
Full length moulded spray deflectors  
Hull/deck join bolted and bonded  
Integrally moulded engine bearers  
Isophthalic gel coat backed by isophthalic resin-rich powder-bound glass mat  
The deck incorporates polyurethane foam cores for high strength and excellent thermal insulation  
The integral bathing platform gives the boat a longer waterline length for improved performance, particularly at reduced power settings  
The propellers are set in semi-tunnels enabling the engines to be located further aft, also reducing draught and improving efficiency by reducing the shaft angle  
Transverse and longitudinal strengthening stringers throughout hull
